DVD concept

By Malachy Neal

Fun

- Your DVD player stopped working and it is your job to fix it by guiding the logo to the correct spots to hopefully watch your favorite movie "The Lorax on DVD", without having to pay for a guy to come in and fix it himself.

Background

- You hacked into your DVD player to get extra frames per second but messed up somewhere and now even the usual DVD logo bouncing from corner to corner doesn't work like how it used to.

- You play as the logo attempting to fix itself

Features

- Sliding
- Size alteration
- Points system
- The Lorax as player two

Pillars

- Sliding 50% - You slide the logo around the screen.

- Size alteration 40% - You change the size of the logo to fit the square.

- Points system 10% - every time you succeed you gain 100 points

Fun work

- Calls to mind when DVDs were in common use.

- You can compete to see who gets the higher points

- Features the Lorax
